

The New AIIM Columbia River Chapter & the AIIM NW Chapter are proud to present ...

OCT 30TH, 2008

Is SharePoint in Your Future?

Exploring SharePoint ECM Integration and Records Management Strategies

The AIIM Northwest Chapter will host the debut AIIM Columbia River Chapter event in Oregon with a presentation covering Microsoft Office SharePoint Server (MOSS 2007), the emerging technology that is redefining market directions and capabilities in strategic content management. Richard Anderson of Clearview will address Microsoft SharePoint as an emerging ECM platform and standard for records capture and retention. Rano Joshi of Vorsite will discuss SharePoint applications in healthcare and will address issues in strategic implementations of SharePoint. Harold Lloyd of Autonomy will discuss how intelligent document recognition solutions complement SharePoint, focusing on efficiencies of automating Business Process and Records Management.

This will be an excellent opportunity to learn more about SharePoint and ECM, explore the benefits and features associated with the SharePoint platform, and how SharePoint can be used in both private sector and public sector applications.

This event is proudly sponsored by:
