

# Empowering Records Management with AI-Powered Document Processing

ANDREW LYONS & SUSHEEL JOHN

# ibml's Offerings

Software | Hardware | Services

## What we provide:

Advanced intelligent document processing solutions that process and deliver critical information at accelerated speeds

## Allows customers to:

Reduce operational costs

---

Spot costly exceptions earlier

---

Improve turnaround times

---

Consolidate processing

---

Eliminate tedious manual feeding

---

Speed up post-scan sorting

---

And much more...

---

# Blue Chip Install Base

ibmi provides a valuable solution embedded in mission-critical processes within the world's largest organizations

 Government	 Banking	 BPO	 Partners/SI	 Insurance	 Healthcare

# AI Adoption in the Enterprise

AI is real—but only when it's built for production. IDP is one of the few places where that's already happening.

Deloitte, State of AI in the Enterprise 2026: Fewer than half of organizations have more than 40% of AI initiatives in production

---

AIIM / Deep Analysis, Market Momentum Index: IDP Survey 2025: 78% of enterprises are already operational with AI for document processing 66% of new IDP projects are actively replacing legacy systems

---

# Overhaul Your Capture Performance

## What's Slowing You Down:

Manual Document Separation

---

Poor Classification Accuracy

---

Manual Data Capture

---

Handwriting recognition

---

Hard to setup and adopt to change

# Manual Document Separation

Why separation is still manual?

Mixed Packets

---

Inconsistent Batches

---

Dependency on Separators

---

# Classification Accuracy

Why classification fails...

Template based approach

---

Training with large samples

---

Long implementation cycle

---

Needs coding

---

# Manual Data Capture

Legacy manual data extraction is expensive

Manual keying still common

---

Forms don't stay "standard"

---

Handwriting breaks automation

---

# Implementation complexity

Why IDP projects fail?

Long implementation time

---

Dependence on vendors

---

Time to show ROI

---

# AI That Works Inside Your Walls— Not Outside Them

IBML CORETEX AND ALL AI MODULES RUN  
ENTIRELY INSIDE YOUR FIREWALL

Fully contained within your own environment  
or private cloud

---

No external data sharing or model training

---

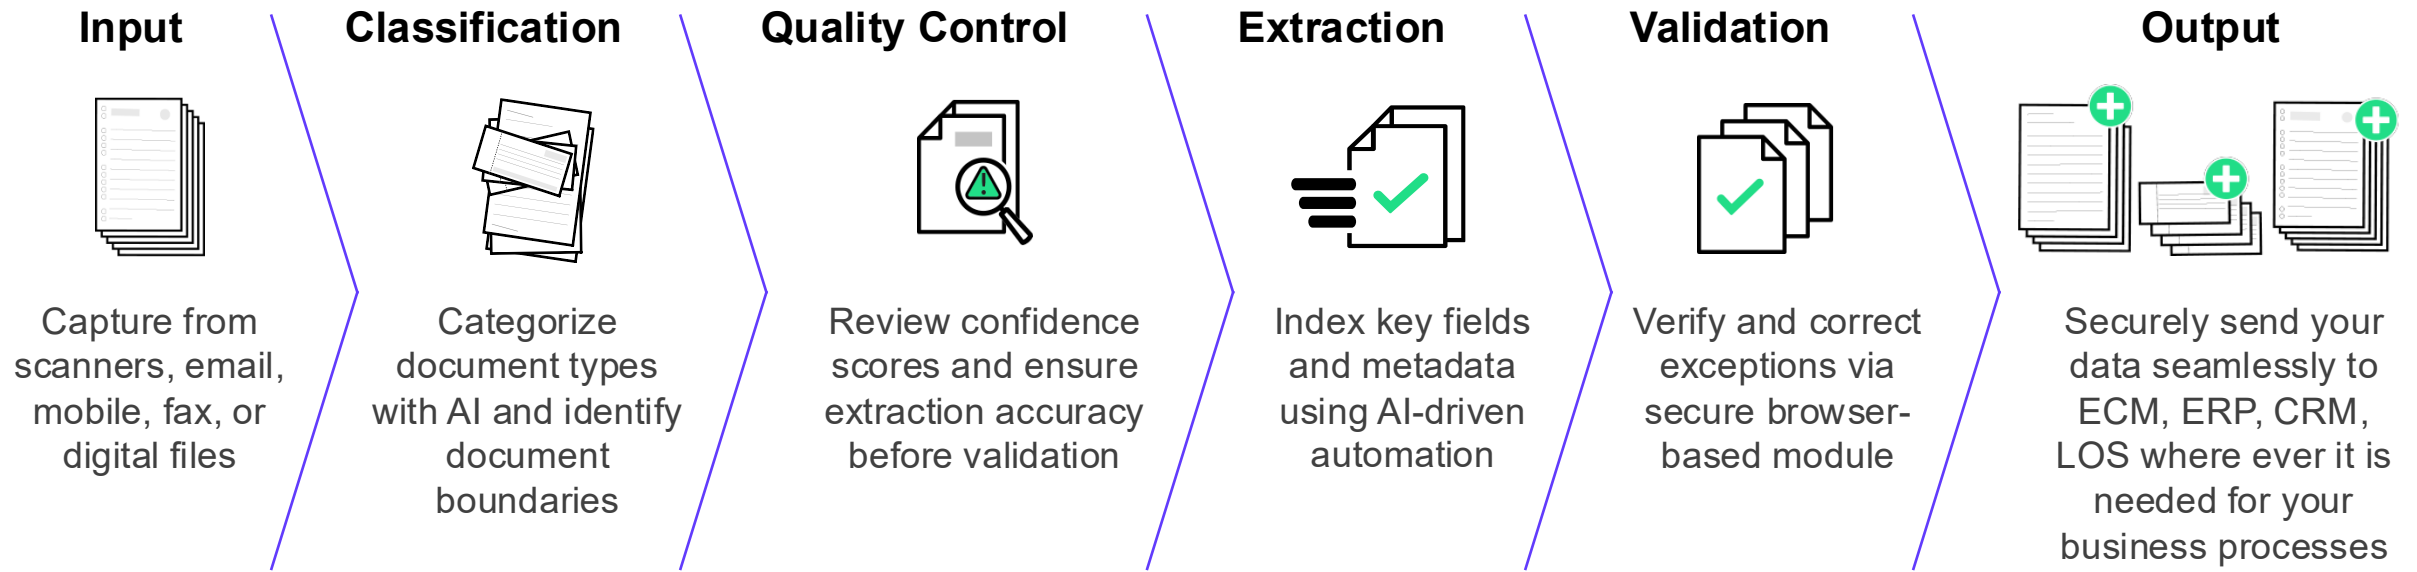

Full governance and visibility

---

Scales securely across your enterprise

# Transform Document Processing From Input to Insight

Discover the difference. **ibml Coretex.**

AutoIndex AI

AutoClassify AI

AutoForms AI

**Discover Our New AI Modules**

Rapidly automate indexing, classification, and more

WE WANT YOUR FEEDBACK
